Study site
(population, pathologist,
ascertainment)
Confounders
Maternal age, BMI,
race and ethnicity,
education, income,
marital status, smoking,
parity, diabetes,
chronic hypertension,
infant sex
S: survived and
examined at one year
(IPW)
Placental pathology
MVM, AI, or both
Association of interest
Infantile
haemangioma
Gestational age and
foetal growth (mediators,
not adjusted)
